Work Experience

Tradeweb

Jersey City, NJ

ASSISTANT VICE PRESIDENT | SOFTWARE ENGINEER

June 2021 – Present

- Creating new alerting UI for dealers to see incoming bond trades/actions from other dealers/traders use Angular.
- Utilizing GraphQL subscriptions to initialize and manage trade alerts for 1000+ dealers.
- Implementing and owning an admin service for the support team to diagnose and change user connections using Kafka and web-sockets.
- Improving existing history services to display more relevant data to traders, and implement data export feature.
- Mentoring interns by guiding them through their summer projects and having weekly check-ins.

Vanguard

Malvern, PA

DEVELOPER I

June 2020 – May 2021

- Rewrote legacy monolith application into micro service and micro front-end based application using Angular/NestJS.
- Improved user experience by introducing responsive animations and UX feedback to the app.
- Implemented custom dynamic form validations using RxJS Observable/Subjects.
- Enforced better coding practices by enabling strict mode on Typescript, adding linting rules, and introducing pull request template.

Button

New York, NY

iOS ENGINEERING INTERN

June 2019 – August 2019

- Assisted partners by creating an iOS app using SwiftUI and Button's API to showcase the best way to implement Button's products into their own products.
- Updated Button's iOS merchant library to provide partners an easier way to report customers' orders to Button.
- Created an iOS and an Android app that used Button's API using a single code base written in Kotlin Native at company hackathon.
